

Where does the name Ordnance Survey come from?

1833

a geographical survey (mapping) of Great Britain started

led by expert gunners who were trained in measuring distances

ordnance

cannon or great gun

survey

look upon or notice

This map shows the regions of the UK

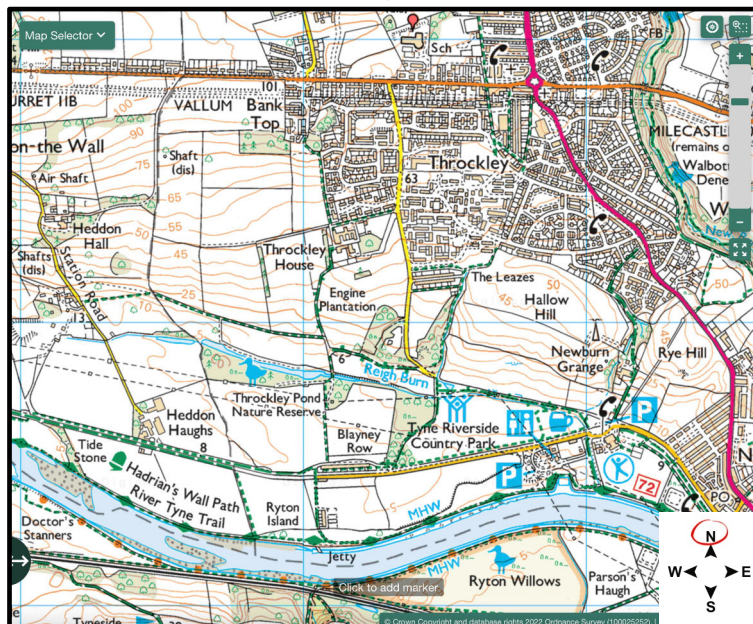

This is NOT an OS map

This is a **small-scale** Ordnance Survey map

When you look at an OS map, **North** always points to the top of the page

This is a **large-scale** Ordnance Survey map

small-scale OS map

places and spaces look **smaller**

wider view of the area
cities, towns, motorways, mountains and hills

large-scale OS map

nearer

buildings

roads

rivers

historical sites

everything looks

larger

Map key

unlocks the map

symbols help you read the map

Sch = school

P = parking

= toilets

= leisure centre
