

Animals require

Plants require

Plants help people and animals to live because:

```

graph TD
    A[Plants help people and animals to live because:] --> B[All people and animals need oxygen to breathe.]
    B --> C[Plants produce oxygen]
    C --> D[Animals get their food by eating plants or other animals]
    D --> E[Plants provide food for people and animals to eat]
  
```

Food chain - the grass goes into the rabbit and the rabbit goes into the fox

habitat - a natural environment or home of plants and animals

microhabitat - a very small habitat, for example woodlice under logs

Movement

Living things **MOVE**

Respiration

Living things **RELEASE ENERGY** from food

Sensitivity

Living things **REACT** to their environment. Plants **move** towards the sun, humans cover up

Growth

Living things **GROW** and get bigger

Reproduction

Living things **REPRODUCE** to create offspring

Excretion

Living things **GET RID** of waste products

Nutrition

Living things need **FOOD**. Plants make their own. Animals eat plants or other animals
